SUMMARY

I'm a **Full-Stack Developer | Frontend Engineer** with a strong product mindset, bridging **frontend leadership**, **backend architecture**, **AI** and **UI design** to build scalable, user-focused digital experiences. I thrive in building end-to-end solutions - from crafting intuitive frontends to architecting robust backends. My approach is deeply collaborative, and I enjoy aligning technical execution with business goals. My experience extends to quick-thinking startups and fast-paced teams where shipping, iterating, and collaborating closely with designers, project managers, and stakeholders is key.

TECHNICAL SUMMARY

Frontend: React, Next.js, JavaScript, TypeScript, Tailwind CSS, Vite

Backend: DRF(Django Rest Framework), Node.js, Python, REST APIs, Express.js

Databases: PostgreSQL, MongoDB, Firebase, Redis, Supabase

DevOps & Deployment: Git, Docker, Vercel, Netlify, GitHub Actions

Design & AI Tools: Figma, Lovable, v0, AI Agents, Lindy, Emergent, Adobe XD

WORK EXPERIENCE

Power Learn Project Africa (Hybrid)

June 2025 – Present, Support Team & Mentor

- Provide timely and professional support by responding to learner inquiries via email, ensuring clarity and resolution for both current and past cohorts.
- Manage and resolve support tickets efficiently through the Admin Dashboard, contributing to improved platform operations and learner satisfaction.
- Assist in organizing and executing both online and offline events, offering on-ground and virtual support to enhance engagement with learners and prospective participants.

Full-Stack Developer (Frontend Lead) — M-TREAT

Jan 2025 – Apr 2025, Remote

- Led frontend delivery for a healthtech platform (3 devs) using React/TypeScript and Tailwind; standardized design system and code reviews, improving UI consistency and maintainability.
- Implemented secure authentication and onboarding (JWT/OAuth2) with Django REST APIs; reduced drop-off during signup by 12%.
- Optimized performance via code-splitting, asset compression, and React Query caching; cut LCP by 25% and increased session duration by 18%.
- Partnered with product and backend developers to launch retention-driving features (reminders, personalized feeds), contributing to +15% of a 30-day retention.

Freelance Web Developer & UI/UX Designer

January 2024 – Present, Remote

- Designed and developed responsive websites and custom landing pages and web apps for SMEs, health startups, and personal brands using Next.js, Python, Vite, JavaScript, [Node.js](#) and Django Rest Framework.
- Improved client websites' performance by an average of 10% through optimized assets, code splitting, and lazy loading.
- Integrated tailored features like booking systems, dashboards, and API connections - increasing client conversion rates by up to 20%.
- Maintained an average issue resolution time of under 48 hours, boosting client satisfaction and minimizing downtime.
- Delivered interactive mockups and wireframes using Figma to align client visions with development goals, leading to faster approvals and fewer revisions.
- Collaborated with developers to ensure pixel-perfect implementation of design systems and component libraries.

EDUCATION

o Bachelor of Arts & Social Sciences'

Maseno University - MASENO, 2018 - 2022

- **Software Engineering Course**

African Leadership Experience (ALX) - Nairobi, Africa, 2023 - 2024

SKILLS

Core Frontend

React · Next.js · JavaScript · TypeScript · HTML · CSS · TailwindCSS · shadcn/ui · Vite · Material UI

Backend & APIs

Python · Flask · Node.js · Express.js · SQL · FastAPI · REST APIs · GraphQL · WebSockets · JSON · Axios · Django Rest Framework (DRF)

UI/UX

Figma

AI Tools & Automation

AI Integration · Claude · Lovable · v0 · Prompt Engineering · Gemini

Testing & Quality

Jest · React Testing Library · Postman · ESLint · Pytest · Chrome DevTools

Databases & Caching

PostgreSQL · MongoDB · SQLite · Supabase · Firebase · Redis

DevOps & Cloud

Vercel · Netlify · Render · Docker · Git · GitHub · GitHub Actions

Tools & Observability

Sentry · Datadog Agile · Scrum · CI/CD Pipelines · Version Control · VS Code · Jira · Notion

PROJECTS

· Booking systems · Dashboards · Analytics · E-commerce · Landing pages · Portfolios · Business · Event sites · Nonprofit sites · Blog sites

CERTIFICATIONS

J.P. Morgan Software Engineering Virtual Experience – Forage (September 2024)

- Gained hands-on experience with real-world financial systems, including setting up dev environments and debugging code in a simulated corporate setting.
- Utilized JPMorgan Chase’s open-source Perspective library to build dynamic, real-time data visualizations - enhancing my understanding of data pipelines and frontend performance under live conditions.
- Strengthened practical skills in collaborative version control, code debugging, and building UIs for high-stakes trading platforms, which now inform my approach to frontend reliability and speed.

ALX AI Starter Kit Certification (February 2025 – March 2025)

- Integrated AI tools into my development workflow, improving efficiency in content creation, prototyping, and automation as well as leveraging AI in full-stack projects, enabling smarter automation, better personalization, and data-driven features.
- Learned prompt engineering techniques to generate precise, tailored outputs - skills I now apply to optimize chatbots and AI-driven features in web apps.
- Built a functional no-code website using AI APIs, gaining insight into low-code architecture and rapid prototyping, which I use to validate client ideas faster.

ALX AI for Developers (I & II)- June & September 2025

- Gained hands-on experience in integrating AI into web and software development workflows using APIs and pre-trained models.
- Built intelligent features like **sentiment analysis**, **chatbots**, and **recommendation systems**, demonstrating how AI can enhance user experience and decision-making in real-world applications.
- Explored responsible AI practices, including ethical data use and bias mitigation, ensuring the development of trustworthy and user-centric AI solutions.
- Developed AI Agents to automate repetitive or complex tasks, improving project delivery speed and introducing smarter automation into my freelance toolkit.
